darksnipa wrote on Fri, 15 December 2006 12:11Uuhm..Servers crash when you use an objects.ddb file. Rename it to objects.aow and it should be working fine. And delete the .lsd file.

Forgot about that

Yeah, if you have SSAOW (recommended) change objects.ddb to objects.aow. And you don't need the .lsd file unless there's problems with doors ('lag' through them) or if you're using waypaths.
