Subject: Serial Number Sticky Not Working
Posted by gr8patman on Tue, 19 Dec 2006 03:41:22 GMT

I am starting a server for my clan on WOL, so i downloaded FDS (the newest version) and run the setup. I got to the enter your WOL nickname and password and serial number. I don't have a serial number so I saw the sticky and tried to use the 0069 trick but it didnt work. It says Next at the bottom but it wasnt clickable. I entered 0069 followed by 18 random numbers. If it did this wrong please tell me, and tell me how to do it right. Or just if you how i can solve this then just reply. I attached a screenshot of what it looks like, so any help would be greatly appreciated.
