If other people in this community feel I should, then I'll take their advice and continue to argue with you. Otherwise, I think I've proven myself quite well, kid. All you proved was that blacks commit more crimes. You proved no correlation between the race and crime. Like I said, you only looked at one variable. Environment effects the outcome of people GREATLY. If you take a black person from a rich family and a black person from a poor family, they're not each as likely to commit a crime. It's not genetics, it's environment.
