I placed then beacon on the ped, and I had to leave soon after the single game, which I told him. Anyway, he went in the hon, couldnt do anything about it, it went off and because I knew at that point I had already won (because of the end game beacon delay), I had left. 10 sec later, he went on msn to tell me end game beacon was off (although im not even entirely sure if thats true), and i have a SS of just that.

Anyway this is all besides the point the really question is how can we employ a "pure mode"?
