Isn't it supposed to be 0669 or 0699? (one of the two)

Also, a random serial won't work anymore as XWIS requires a valid serial for servers now. You can use that trick to install it, but then you will have to open server.ini and change the serial to match your Renegade game cd serial key (these are also now valid server serials on XWIS, but you can't use them to install the FDS)
