Merovingian wrote on Fri, 22 December 2006 19:06 You should make it 'cross regulator' when you've got it working with Sbot, then it'll be the greatest in mod and cheat detection since 'out-of-game' mods have a visual into the server, not just IRC text.

I thik it might help a little in chet detection, but not all that much I did say. You cant spot aimbots, nor damage hacks, and even wall hacks would be difficult, as that could also be a timed.
