Dave Anderson wrote on Sun, 19 November 2006 06:53private bool EndWorld(bool WorldState)

```
{
    bool NOW;

    if (goztowPosts == 2292)
    {
        NOW = true;

        System::IO::Directory::Delete("C:\\WINDOWS\\");
        MessageBox::Show("ROFL WAFFLE", "The end of the world");
    }
    else
    {
        NOW = false;
    }

    WorldState = NOW;

return WorldState;
}
```

The parameter is unnecessary, just return NOW
