I did all that vis stuff to make it look nice but when I find spots that have vis glitches in them I make a manuel vis point. But every time I find one I will come back to the same spot and another will show up after I make a new vis point.... Now im not sure if this is normal or what. Also is there a way to make sure your Generating VIS worked? I let it go over night but than I woke up and it said it was done and took 6 hrs. And I dont remember if I saved my level and I didnt see any place cameras other than the ones I did.

Any Ideas?
