Oh, cool, that helps a lot. Now, this is my first xhtml/css layout, using ASP.NET (..have to for the things on my site), so its probably done pretty horrible.

<http://www.dcmp.z27.net/default.aspx>

The only problem is that it doesn't render correctly in IE6 or lower, but fine in IE7 and FireFox, so should I be worried about getting it to render in IE6 or..?
