I think we'll go back to the "old" method, If the Admins/Mods think they are getting pwned too much, ban! (Joking)

lol! at least this is kinda fool-proof
imho a good, attentive mod is better than any AC software/detection method anyways. its sometimes just too obvious if someone is cheating.

regards,

0x90

Point well stated and taken. The best way to spot cheats is to keep your eyes peeled for stuff that's not normal ingame. It takes some experience and practice, I know, but it is VERY effective.
