Something else worth noting: These are portraits on the Temple of Nod's interior walls, Renegade's last level.

Apocalypse Tank in Renegade... hmmm. Its obvious the 2 series were going to be linked, since there now is an Ra2 asset in a Tiberian-series game.

We can only suggest, that with all this information, pics, and interviews released, that Renegade 2 was going to fill in the gap between Red Alert 2 and Tiberian Dawn.
