I have crashdumps generated when it crashed on SP.

Oh and info on it, so far that I have made it to was, I made it past the first mission and than once I got onto the second mission loading screen with teh hovercraft it crashes 9/10 the way done. I have tried this numerous times and has done it atleast 5 times. Same spot. Also it seems that renegade takes longer to load up after I click renegade on renguard console. If that helps any either.
