Perhaps all the mod teams (from APB and Reborn and RA2:AR and whatever else) could start working on something that is very very close to what Renegade 2 would be, then when EA sees it, they'll say that their assets were stolen and sue the team like Microsoft did to Halogen which would force them to start working on a C&C FPS. Just maybe...

Renegade itself is one of the most "living" multiplayer FPS I've seen at its age. I don't really see a lot of people playing newer FPS's like SW: Battlefront. In fact, I think a game would run better if it's run by people in the community who are dedicated to seeing the game live on.

Get Roleplay 2 now by the way, its great.
