Cat998 wrote on Sat, 13 January 2007 13:26 Routers: OSI Layer 3 (Network layer)

Switches ("intelligent hubs"): OSI Layer 2 (Data Link Layer)

Hubs: OSI Layer 1 (Physical/Bit Layer)

right.. plus even switch is more a marketing word. a switch is in fact a network bridge:

[wiki:network_bridge](#)

very interesting wiki-page. the OSI stuff also gets explained a little bit there
