I would recommed you stick with XP. If you want the Vista feel without using 500MB for Vista alone then I recommend downloading a Vista XP theme like I have. My average RAM usage was 330MB, with the theme it has gone up 2 350mb so I can't really complain about 20mb compared to 200.

Vista isn't needed and most probaby won't be needed untill 2008 (When the new games use DirectX 10)
