gbull, i would have to say that i hope my kids never do either one of the three. but the thing is that marijuana smoke is less toxic to you that tobacco is, and if you are worried about drugs in the atmosphere how do you feel about all of that pollution in the atmosphere. it really depends to what extent you drink to consider it better than weed. if you are an alcoholic it is much worse than being a pothead. i mean sure smoking it makes you loose brain cells and your memory is going out the window, but if you are an excessive drinker, you got the liver, kindeys, stomach to worry about and did i meantion you still loose braincells? lets just say this if it was up to me i would rather have a pothead for a son, than an alcoholic. and smoking well thats another issue, some say that if you smoke weed you smoke cigarettes, not true i know over 2 dozen people that dont smoke but still do weed.
