Alkaline wrote on Mon, 01 January 2007 10:42Does anyone know of a way to setup renegade so that it will show up with the correct aspect ratio on widescreen monitors? Currently I can select the resolution, however, it is 4:3 streched to 16:9 mode
It seems that Renegade cannot handle widescreen resolutions properly... I get the same problem. The buttons overlap the pause screen but other than that, the game runs fine.
