Personally I am insulted.
I dont run any cheats.
I have some custom textures I have some custom maps.
Renegade worked before I installed 3.1.3 and now I get the aforementioned error.

Edit: I killed ATI Tray Tools and the oridginal error is gone. Now I recieve the error during load that scripts2.dll failed to load.

dllload.txt says "scripts2.dll failed to load, error = 1001"
