ok, new problem, when i get into a server it closes renegade and says im cheating cause there is a game.exe corrupted file, how do i get rid of that??

Glad to help, and this is very interesting as you've had the exact same problem as me! Renguard also said that my game.exe was corrupted/bad file and it disconnected cause of "cheating"

Like waht cmatt42 said, wait a bit, I just closed down Renguard, then opened it back up again and it worked fine
