Also, tyler. I believe it is against the law if you don't tell the customer/consumer of your hosting services when their site is going to be shutdown.. If I am wrong, please correct me. If I am right, I ask for permission to download my files, change my nameservers back to bluehost's, if not, I believe I will press charges against you. Or possibly contact your reseller to sue you. Your choice, you got a couple of em.
