Im not talking about other maps, I made this server on LAN, so I didn't do it for my advantage. The header reads, "Field.mix Exploit Debate", because I think its an exploit (or otherwise BI would not waste their time fixing this and many other reasons). This video obviously does show how to do it, but like I said before everyone knows this already so im sure its not a big shock (as Mero explained on other maps aswell). So basically my argument is saying this shouldn't be allowed, so I have no idea where you got the idea im FOR this?
