How are people who want to run their own server going to obtain a valid serial without the request serial thing working ?

Not just for Renegade but also for APB or any other Mod that was released for Renegade.

Are the serials still limited to like 9 nicknames? If yes, then it is nearly impossible to create new servers on XWIS for Renegade or any mod based on it....

I still have maybe 10 valid fds serials that are unused. But unless they are nickname count unlimited it is useless to even include it with the fds installer..
