[sgthe0ne]snipefragI know i glitch which under certain conditions after timed C4 is thrown kills everyone in the game on the opposite team might have been that, its very hard to do tho....

Speaking of c4 and glitches (some of u are already aware of this) : when ur out of c4 and u pick up a credits box weird things happen ! Yesterday it refilled my remote c4 for me (the active weapon) and another time I picked up a sniper rifle then the credit box and it gave me full ammo !

I believe that credit boxes will randomly give you either more credits or refill all of your ammo. I think I read this some place.
