rcmorr09Ok i just downloaded the dedicated server, now how to i run it, when i open it u get that blue screen that logs u on and stuff how do i creat a game or pasword it, plz help im so confused.

Read the read me file in the folder.

You shut your server down then open your FDS folder. You do your editing from the server.ini(in the FDS server folder) and server.cfg (in the FDS data folder).

But always remember...
RTFM

Read The F'ing Manual
