ok u realy have to make cheaters open up there data dir and take a SS before u know they hack. that alone is not anough proof but that + all tests can show hacks, if u think some 1 has big head, u have to make them take a test with every char, cause they could have a incomplete set of heads. THE TESTS must be completed before the end of a game or before they quit, if the stand still to long in servers they can be auto kicked for afk, which allows them to get away, if u get a ss of data dir, compare it to a good dir, like a non cheating mod's dir. if u really wanna find out how to spot hacks use them your self and take notes, cause guess work is virtualy useless.
