Hi pal, hope this helps. oh and if none of the options works from the first post, then try 192.168.1.254 or 192.168.1.1.

and "Web Browsing Interception" is still a mystery, its not in the manual or help guide! it seems to be related to parental contol, but as 0x90 said "it's only affecting renguard" very strange indeed

peace
