Okay well, tried to play Renegade lately, unbeknownst that my Hard Drive would go all corrupt. Fixed it (without having to reformat) and went to reinstall Renegade and uninstalled Renguard, despite the entire Renegade directory being deleted after I fixed my Drive. So I went back here, downloaded 1.3, 1.03, whatever is the latest one. Then Installation is going good then an error comes up "C:\Westwood\Renegade: Renguard must be installed into your Renegade directory!"

Yea something is messed up...
