Subject: Different Telnet information than normal.

I was fiddling with Telnet and decided to connect to my parents computer which houses the router. Upon connecting I got prompted for a username and password, so I just guessed and it connected. Now this isn't what Telnet usually looks like when connected to a local computer on the network, so I am curious if anyone here knows if this is Telnet on my router or is it Telnet on my ISP's end?

Here is a screenshot of what the connection information looks like:
