Dave Anderson wrote on Fri, 23 February 2007 08:50It's good practice just to double everything they put and use that as a guide. They don't do a very good job at being honest.

They want people with crappy systems to buy the game too. Then those people get the shaft because the game never plays like it should because their system's performance sucks. EA makes money selling the game so they are happy, while the customer now is pissed off and must upgrade after all to make their \$65 PC game worthwhile.
