Step one Select Vertex Pain in the modifier List, then click the "VertCol" and "Shaded" Buttons. Click the brush and select a color (darker make the first material more opaque).

Second Make the texture and give it two passes:

For the first change nothing but the texture (this will be the black color). For the second pass change the shader to alpha blend:

And give it what ever texture you want (this will be the white color, so check display). I remember my first 13 mods none of which had blended textures (all I had was dial up so I did not bother with forums).

So if you have any other question ask and I will help you out.
