you should get some one to help make a mod with some of that stuff in it and that gun that lifts the stuff in air you wouldn't have to worry about enemy vehicles just make them go up and keep dropping them on guys use your own car and leave it in the Tibarex field so when a guy tries to get it you pick it up and drop it on him need to make it so you can move with it though so you have a giant club and take over building rush guard tower or obelisk with guy to take it over and guard it hope you didn't want that defines starts killing every one
