I admire the work the person who made it put into this, but its a whole load of crap.

You can see in the image, the earth is getting smaller, and everything is getting squished up.. If you take away the water, you would have land everywhere, if it gets smaller, (the opposite of the thing it said it is) we won't have any water, so we have many more things to look on.

- 1) Global Warming (which I don't believe in)
- 2) Global Dimming (I do believe in)
- 3) Earth growing (doubt it, maybe dead people and more people would consider on the mass of the earth, but not the physical size)

Im high as hell right now, I don't know if any of this makes sense so
