A few test is to simply do the average test. Make them shoot around the head yad yad. What I would also do is, make them take an ss of them ingame which ya cheats can be turned off. But most of those require a renguard bypass or hook. These hooks will load up when u load renguard but it will say that its patching game2 or something or generateing a serial hash. Make them take a picture of renguard that include the server listing there at, at the top.
