I may do that, but first I am going to take it to our actual principle. Unfortunately, the bad part is that our school board members are really closed minded and rude. Our school is the least funded in our state and the most poor (yet, the best rated school) and the school board usually won't do anything to try and better our school if the idea's/comments come from a student or parent. They are rude when it comes to a student or parent bringing up a problem with a school's administration too.
