EnglandSkier222and i care y?
i could just go on the website if i did want to know. :rolleyes: :rolleyes: :rolleyes:

Dumbass

spotelmoi have been unable to get to the pitts site. has it been down? or has the link changed? or does it have a problem with ie5.5?
i know it's an older version of ie, but versions above it really suck.

There are two sites provided by the-pits

<http://renegade.the-pitts.net> is the Gameserver Forums
<http://www.renmaps.com> is a free maps database provided by the-pits

i've tried them both and they both time out for me.
i'll try again when i'm at work tonight. if it works there, then i can assume it just has a problem with my older browser. i just hope i can download from work without a admin issue, then email the maps to myself at home.
