Okay, I'm not going to use restraint on this one because I'm tired of saying "Google it".

Listen, before you come and post a fucking retarded question (let alone a thread for the retarded question), why don't you use Google? Better yet, Wikipedia probably works too. I mean, is it so hard to go to http://en.wikipedia.org/wiki/IRC?

My suggestion to you is to never use IRC. Unless you find an IRC network run and filled with idiots (which is surprisingly easy), you'll never get anywhere without being insulted left and right. If you DO find a network full of idiots, you'll successfully be building onto the black hole of knowledge. That's not a good thing.
