---

I have 2 soundblaster cards, ones an audigy 2 and my new Xtremegamer. The Audigy fits into the same slot that I'm trying to insert my Xtremegamer into. Now the thing is, that the Xtremegamer fits into my other computers PCI slot no problem, the same slot that my Audigy 2 has been in for a long time.

What could be causing this? Any help with a way for me to insert the card would be appreciated.
