I keep having the WWConfig utility popping up, Renguard won't start, and when it dose won't stay connected.

An error occurred within RenGuard. Please report this error: recv - 10054 is what came up the first time!??? I've tried reinstalling Renguard SEVERAL times and it still doesn't work!!!

Please try the manual update process. It has to do with people who use the auto-start Renegade setting...
