OK heres mine problem, yesterday my RG updated and was crahing game like a hell, doesnt matter that i lost about 3 vehs in most appreciated moments but the problem is that i cant even run rg now. Today rg updated once again, since this time it doesnt work, no windows nothing, just lioding mouse icon. I decided to uninstall my rg, then i downloaded 1.0322. heres the error which pops out during the instalation

i really dont know what to do to make it work so please help me. of course every file is in right place, old rg installer works fine.
