Quote:

Connection reset by peer. An existing connection was forcibly closed by the remote host. This normally results if the peer application on the remote host is suddenly stopped, the host is rebooted, or the remote host uses a hard close (see `setsockopt` (Windows Sockets) for more information on the `SO_LINGER` option on the remote socket.) This error may also result if a connection was broken due to keep-alive activity detecting a failure while one or more operations are in progress. Operations that were in progress fail with `WSAENETRESET`. Subsequent operations fail with `WSAECONNRESET`.
