k so i just got over one problem with renguard and now ive got one much much worse. now i click on the renegade icon, renguard opens up, i click "renegade" and the whole thing shuts down. so i click on the renegade icon again and this time it thinks for a couple seconds but doesnt open anything. and now it doesnt open at all. i restarted my computer, tried again, same thing. it opens, shuts down and wont open again. whats going on here?
