That's my isp service, And I'm on 4MB, Oh, And your upload speed is actually 47kbps.

And your download speed is 255kbps,

Downstream is 2272 kbps + Upstream is 288 kbps.

Those figures are straight off the Router statistics whilst the line is running @ 2mb (after a fuck up by Orange).

Try rechecking your stats as yours are way too low.
