Without Renegade, my life would be empty. I play this game so much that it is like a part of my life! Am I playing too much? lol!.

What I am trying to say is that Renegade is a GREAT game and I am dedicated to it...which means I play no other game other than Renegade.

But I understand what you are trying to say...I have the same problem but not every server is like that. Occacionally, there is a cheater in the n00bstories server but they get kicked out after people start mass-complaining.

Other than that, I faced the same problems you faced...I forgot which server but once this bastard Deadeye kept getting one-shot kills...it's impossible but he racked up his kills. I think I have the SS of the game result. This scumbag is still around with his "exploits." I know this cheater's nick but I won't say it here unless you want me to.

Then I faced the same problems with the bastards seeing my stank from across the map. Once in CnC_Field, I got an Stank and went out my base. As soon as I went out, the Meds which were camping on the GDI base entrance started firing...it's annoying as hell but that's how corrupt some parts of the community has become.

I never had the problem with the Mendoza and SBH getting killed across the map but maybe you played in a different server.

Viking man, I say you don't read much into it...it's annoying but if this bad crap happens, just curse out the cheaters and the server host and just quit the game and go to a different game. It's works most of the time.

BUT WHATEVER YOU DO, PLEASE DON'T UNINSTALL RENEGADE! LOL! PLEASE DON'T...IT'S A GREAT GAME WITH NO EQUAL!
