Valherran wrote on Sat, 12 May 2007 10:35 For the past godamn week, that POS anti-cheat program Rengaurd has annoyed the fuck outta me FOR THE LAST TIME! I am constantly (every match and a godamn half) getting auto kicked for not running RG, along with several other players! When it kicks me, it doesnt tell me that i need RG to play on this erver, no, it kicks me as if a game host evicts me, and i STRONGLY reccomend you fix this fucking thing before you loose ALOT of players on n00bstories and Renegade altogether, WTF should we run an anti-cheat-program that doesnt function correctly, this is NOT fair to all the legit players in the Renegade Community, im sorry...

(picked the wrong area to post, plz move it to RG threads)

The Renegade Community eagerly awaits your Renguard substitute, as you clearly know more than they do.
