Is it possible to have the RG client detect a name change between when you load Renguard, and when you log on to XWIS?

If you get this (For example)

Welcome to Renguard Medic1990

(That's my pesky brother who was the last guy to use Renegade...)

I then select and use my nick at the login screen, and sign onto XWIS as CarrierII.

On the current version, I have to restart Renegade to get my name verified by Renguard, which is annoying.

Couldn't you just authorise the second nick because the data folder is identical (So is the IP, and the HDD serial etc, it's the same PC) so I don't have to restart Renegade?

That was probably unclear. :s
