ok idk nothing about scripts idk where to get this ""JFW_Base_Defense" at or how to attach it

In one of your other threads I replied about this.

Quote:

Presuming you have added a folder in your mod package called "scripts" and added the scripts.dll (the one i sent you, or some other one), scripts2.dll and bhs.dll to this folder. Then when you "mod" a preset, go to the "scripts" tab and there will be a list of scripts to choose from (these script names are populated by the scripts folder in your mod package, if you dont see any script names to scroll through then you haven't done it right). The jfw_no_falling_damage script will be on that huge ass list.
