- 1) Thank you for making a readable post. You're in a minority, and I thank you for it.
- 2) Start > Control Panel > Add/Remove Programs > Remove Renguard (Won't hurt your Renegade installtion)
- 3) Redownload Renguard from here

The last step installs the Renguard update without you having to fight with the client, not sure why some people can update, and others can't, but meh.

Don't forget, that as you are installing Renguard with the first decade, you need to follow the instructions here.

Helped?
