So please, The issue was solved, Stop posting here, and stop saying I dont know what Im doing, I solved it first before any of you. Dont tell me Im wrong, It works fine. Its been tested, I was playing a guy with dial up & experencing no lag with 2 modified guns. [All Server Side]

Did you miss the part where you came into a public forum and asked our help?

Or, am I just too, 'n00b' to know what I'm talking about?
