ok how can i edit a map and add stuff like turrents and ceiling guns and ladders to top of some buildings like on map field but bot have to save the map and give it to people all they would need is there default field map........

like on this one serv all i got is basic maps like under so i go to this one sever with the map under they were on but when i join they had new things added and i did not have to download some new map how can i do that like edit field? but not have to send it as a whole new map?
