---

i have recently noticed a lack of CTF maps about, its also evident to me that the CTF maps for the normal renegade levels have many problems i am now going to make a Ut2K3/red faction style CTF map.

Would there be much interest in the C&C community and is there other plans out there for others who are making CTF maps?

PS: i know this should be in the Mod forum but i couldnt post in there because invalid sessions... hopefully crimson can sort it out even tho she doesnt know why it happens
